

CASE STUDY

Rw51 Acoustic Access Panels

The Belconnen Arts Centre is a vibrant facility showcasing dance, music, theatre and art. The facility undertook an extensive refurbishment where an increased acoustic rating was required. A component of this increased requirement was the installation of a large number of access panels that achieved a **Rw51** acoustic rating.

THE CHALLENGE

- Trafalgar Access offers an extensive range of panels, including acoustic options with ratings up to **Rw34**.
- Trafalgar Innovation designed, developed and tested a panel that met the acoustic requirements of this project.
- The panels not only needed to meet the acoustic requirement but also be aesthetically pleasing and seamlessly integrate with the facility's architectural design.

THE DELIVERY

- Trafalgar Access designs and manufactures Australian Made and Owned Certified products to meet or exceed Australian Standards.
- Trafalgar Group rigorously independently tests their products and systems in approved laboratories to ensure a high performance.
- A variety of locking options are available to suit any project requirements.
- Custom sizing up to 600 x 600mm to create the perfect solution for any project.
